## Keep your workplace safe and healthy with our Heat Detection Camera Solutions

[BOOK A DEMO TODAY!](#)

As Hitech Panda, our company mission is to supply proficient and reliable solutions to your problems, reliable thermal imaging camera devices used to detect irregular body temperatures in people.

Our modern cameras provide you with present data tracking, low error rate, non-invasive testing and the capacity to temperature-process entire crowds.

Help protect your business or public space from the spread of coronavirus and other dangerous viruses. It's very easy to use thermal cameras to identify fevers before they enter your workplace. Abnormal body temperature in an adult may mean that they have a fever; one of COVID-19 's most telling symptoms. To scan groups of people at a time, use our fever monitoring tools. Use in entrances, close to elevators and escalators to get the maximum benefit.

If you need a thermal imaging camera to secure your company in Australia then Hitech Panda's range of devices are for you. Each camera is designed for commercial use in both public and private sectors. We provide modular deployment for both wall-mounted and "pop-up" applications.

For a free demo, please contact us so our professional team of technicians can provide more information and book an appointment.

## DH-TPC-BF3221-T + JQ-D70Z

Thermal: 256\*192, 7mm

Visible: 2MP, 8mm

White light and loudspeaker alarm Temperature accuracy  $\pm 0.3^{\circ}\text{C}$  (with blackbody)

## DHI-IVSS7008-1I

TPC alarm event linkage

Statistical report and export 8 channels Mask detection 8 channels facial recognition

## DHI-NVR5216-16P-I

TPC alarm event linkage  
Statistical report and export 4 channels  
Mask detection 4 channels face recognition

## Reliability

# What you get with Hitech Panda

*Hitech Panda has a range of body temperature camera systems including Dahua and Hikvision cameras, these are among the best of the worlds leading thermal imaging camera manufacturers.*

## Auto-detection

*The cameras provided by Hitech Panda are so smart that they can recognize the difference between a person and a hot product, for example a tea cup. The camera will identify that it's not a person, so there's no false alarm going off.*

## Distance

*These state-of-the-art body temperature camera systems can identify forehead heat within a range of approximately 3 metres, enabling your employees to operate cameras from a safe distance while scanning, this would help prevent viruses and fevers from spreading to any of your staff, ensuring a healthy working environment.*

## Easy to use

*Forget overly complicated machines that require hours of training to function. HiTech Panda camera's are user friendly and has got to be the most affordable system on the market. HiTech Panda's range of body temperature scanning cameras offer simplicity and convenience, so you can focus on your business.*

## Consistency

*The cameras supplied by Hitech Panda can detect head temperatures even within large, fast-moving crowds, which means that your device captures more image details and temperature differences than comparable models from other brands.*

## Australian Business

*Hitech Panda is an Australian owned and operated company, so you can easily purchase thermal cameras from us knowing that you'll get the quality service and reliability you expect from a local store.*

## About us

*High in quality but competitive in price,  
we strive to ensure that each project we install is tailored to maximize your vision,  
your safety and the protection of your property.*
